

DAB-sendere og komplette løsninger til gunstige priser.

Velg gjennomprøvd og driftsikre løsninger. Bakke-Nett AS er autorisert leverandør av kvalitetssendere og utstyr fra bla. markedsledende Rohde & Schwarz og Italienske RVR.

Velg en kompetanseleverandør med landsdekkende servicenettverk.

Bakke-Nett AS er autorisert leverandør av utstyr til kringkastingsmarkedet med 25 års bransjeerfaring. Med våre dekningsmålinger er du sikret riktig dimensjonering av sendereffekter og antenneutstyr. Gjennom våre samarbeidspartnere på service og installasjon er vi representert over hele landet med faglig kompetente ingeniører. Dette sikrer deg som kunde god driftsikkerhet, lave installasjonskostnader og raske responstider.

Lavt strømforbruk og varmeavgivning. Den nye serien DAB-sendere fra R&S er energiokonomiske, og strømforbruket er nær 50% av konvensjonelle DAB-sendere. Dette gir lave driftskostnader over tid.

Lite plasskrevende. Kompaktsenderne fra Rohde & Schwarz passer i std. 19" rack. Sammen med integrert EDI/ETI konverter og GPS-mottager gjør dette at løsningen er lite plasskrevende, og reduserer dine innplasseringskostnader. Dette gir orden, oversikt og bidrar også til større driftsikkerhet.

RVR's 500W sendere leveres ferdig montert i rack med tilhørende utstyr som filter osv.

Mange av våre løsninger leveres med passiv-utstyr dimensjonert for enkel oppgradering til høyere sendereffekter. Dette gir deg fleksibilitet, og lavere kostnader ved videre utbygging.

Våre leveransers. Du trenger ikke finne opp hjulet selv. Sammen finner vi mest optimale løsning for ditt behov.

Bakke-Nett AS leverer ferdig idriftsatt anlegg på site, til avtalt pris, så kan **du** fokusere på å lage god radio til dine lyttere.

Ta kontakt: Bakke-Nett AS priser løsninger tilpasset ditt behov og ønsker. Vi bistår også gjerne med dekningsmålinger og totalprosjektering for kartlegging av investeringsomfang ved utbygging.

Prisliste pr. 1/7-16

Regnet etter en Eurokurs på 9,5.

R&S TMV9

350W sender:	Kr: 159 900,-
700W sender	Kr: 189 000,-
1400W sender	Kr: 298 000,-

RVR DAB

50W sender Inkl. filter	Kr: 59 000,-
100W sender Inkl. filter	Kr: 69 000,-
500W sender inkl. filter og rack.	Kr: 169 000,-

Filter:

100W filter	Kr: 19 000,-
600W filter	Kr: 29 000,-
1500W filter	Kr: 34 900,-

Antenner

2 Kw dipol antennesystem med 2 antenner, splitter og mellomkabel.	Kr: 12 900,-
2 Kw panel antennesystem med 2 antenner og mellomkabling.	Kr: 15 900,-

Priser er notert eks. mva. og fraktkostnader.

Doherty technology

- | **Highest power efficiency on the market**
- | **Outstanding power efficiency reduces energy costs by more than 40%**

COFDM-TV and DAB:

- | **UHF: efficiency in normal mode of 25%**
- | **UHF: enhanced efficiency in Doherty mode of up to 38%**
- | **VHF: efficiency in normal mode of 33%**
- | **VHF: enhanced efficiency in Doherty mode of up to 46%**

ATSC:

- | **UHF: efficiency in normal mode of up to 30%**
- | **UHF: enhanced efficiency in Doherty mode of up to 42%**
- | **VHF: efficiency in normal mode of up to 41%**
- | **VHF: enhanced efficiency in Doherty mode of up to 50%**

Example for saving of energy costs

TMV9

- | **Transmitter with output power: 1.45 kW**
- | **Lifetime of transmitter: 10 years**
- | **Assumed energy price: 1,23 Kr/kWh**

	Average transmitter	R&S®TMV9 with Doherty
Efficiency	20 %	46 %
Energy costs	614 180 Kr	323 244 Kr
Saved energy costs in 10 years:		291 000 Kr

- | **Energy cost savings of more than 50%**

VHF power amplifier R&S® PMV901

General

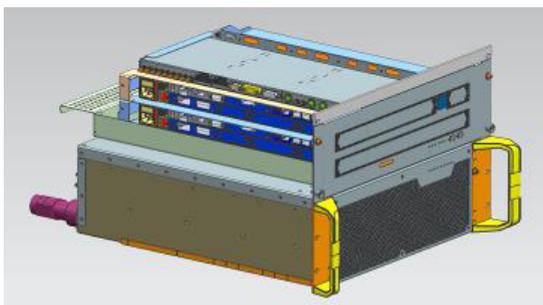

- | **750 W output power**
- | **4 final stage transistors**
- | **Enhanced efficiency mode Doherty (option)**

- | **Power supply 3 kW, passively cooled**
- | **Optionally 2nd power supply for 1+1 PS redundancy**

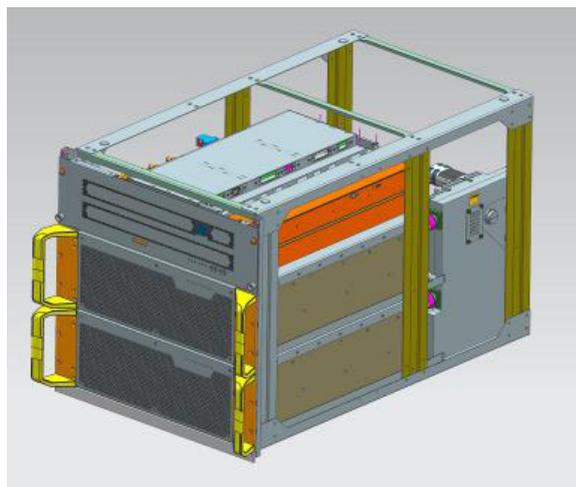

- | **2 Blowers**
- | **Dust filter (optional)**

- | **Harmonic filter included**
- | **Lightning protection included**

Option for integration in 3 party racks for systems with one and two PAs

**R&S®TMU9/TMV9, 1 PA
system w/o rack**

**R&S®TMU9, 2 PAs
system w/o rack**

Simple and quick to install solution for customers with no need for a rack

(Guiding rails and mounting material not provided)

DAB/DMB GOLD 100 front view

Features

- > **MODULATIONS:** the **DAB/DMB GOLD 50&100** fully supports the latest versions of the standard DAB / DAB+ and T-DMB. Other configurations can be implemented on request.
- > **CONNECTIVITY:** two redundant inputs G703/G704 are available, optionally two Gigabit inputs for EDI protocol or a satellite input.
- > **PERFORMANCE:** very high modulation performance (ratio of modulation error, stability, signal level of the generated spurious out of band, low phase noise).
- > **MODALITY:** operation in MFN (Multiple Frequency Network) and SFN (Single Frequency Network).
- > **PRE-CORRECTION:** the powerful digital linear and non-linear adaptive pre-correction guarantees the automatic optimization of the operating parameters for the best quality and efficiency of transmission.
- > **CONTROLS:** the display, indicators and actuators and the simple and

intuitive software configuration interface with icons, allow wide interaction between user and the equipment in an easy to use menu, via RS232 or IP interface with visualization of the main parameters on the large LCD screen.

- > **MONITORING AND TEST:** the **DAB/DMB GOLD 50&100** allows the monitor of the ETI- TS (TS and CRC Error) and includes the generation of a number of test signals (ETI frame, PRBS insertion, suppressed carrier), for an effective verification of the transmitter operation.
- > **TELEMETRY:** the advanced integrated telemetry system allows the signal transmission Alarms and receiving commands via IP or SMS via modem.
- > **MECHANICAL:** the rack is reasonably compact and robust stainless steel in 3 rack units for output power up to 100W_{rms}.

Caratteristiche

- > **MODULAZIONI:** il **DAB/DMB GOLD 50&100** supporta pienamente le ultime versioni dello standard DAB / DAB+ and T-DMB. Altre configurazioni possono essere realizzati su richiesta.
- > **CONNETTIVITA':** sono disponibili due ingressi ridondanti G703/G704, opzionalmente due ingressi Gigabit per protocollo EDI o un ingresso satellite.
- > **PRESTAZIONI:** altissime prestazioni di modulazione (rapporto di errore di modulazione, stabilità del segnale, livello delle spurie generate fuori banda, basso rumore di fase).
- > **MODALITA':** funzionamento in reti MFN (Rete a Frequenze Multiple) e SFN (Rete a Frequenze Singole).
- > **PRECORREZIONE:** la potente precorrezione adattativa digitale lineare e non-lineare garantisce l'ottimizzazione automatica dei parametri di funzionamento per la migliore qualità ed efficienza di trasmissione.
- > **CONTROLLO:** il Display gli indicatori e gli attuatori semplici ed

intuitivi ed il software di configurazione con un'interfaccia con icone, permettono un'ampia interazione tra utente ed apparato con un'estrema semplicità di utilizzo da menu, tramite RS232 o interfaccia IP con visualizzazione dei principali parametri sull'ampio schermo LCD.

- > **MONITORING AND TEST:** il **DAB/DMB GOLD 50&100** consente il controllo dello status dell'ETI-TS (TS and CRC Error) ed include la generazione di numerosi segnali di Test (ETI Frame, PRBS insertion, suppressed carrier) per una efficace verifica del funzionamento del trasmettitore.
- > **TELEMETRIA:** l'avanzato sistema di telemetria integrato consente la trasmissione di segnalazione di allarmi e la ricezione di comandi via IP o via SMS tramite modem.
- > **MECCANICA:** il rack è ragionevolmente compatto e robusta in acciaio inossidabile in sole 3 unità per potenza di uscita fino a 100W_{rms}.

DAB transmitter

> *DAB transmitter series*

DABTX500/00S001

DABTX500/00S001 front view

Features

- > **HARDWARE FEATURES:** thanks to the modularity of the system can be simply realized all the configurations demanded from the customer for every kind of application.
- > **POWER & QUALITY:** with the creation of the new family of RVR's high power modular amplifiers, is possible to realize compact equipments from **500 W** up to **2 kW**, extremely redundant, sturdy, flexible and economic.
- > **RELIABILITY & REDUNDANCY (business continuity):** elevated number of self-sufficient modules and independent between them, that guarantee the continuity of service with a minimum reduction of the output power in case of faults on the main components. If one or more power amplifier modules fails (totally or partially) the amplifier automatically reduces output power to a safe value but continues transmitting. In case of faulty of one or more power supplies, the amplifier continue to work with reduced power.
- > **USER-FRIENDLY FEATURES:** user-friendly software and a simple, intuitive HM interface let you easily set up and control all machine operating parameters.
- > **EASE OF MAINTENANCE:** **accessibility** and ease of maintenance are ensured by advanced modular engineering concepts incorporated in the transmitter and by its **lightweight** components.

Caratteristiche

- > **HARDWARE FEATURES:** grazie alla modularità del sistema è possibile con estrema facilità realizzare configurazioni personalizzate su richiesta del cliente e per ogni tipo di applicazione.
- > **POWER & QUALITY:** con la nuova famiglia di trasmettitori modulari basata sugli amplificatori modulari di alta potenza è possibile realizzare apparati di potenza variabile dai **500 W** fino a **2 kW**, estremamente ridondanti, affidabili ed economici.
- > **RELIABILITY & REDUNDANCY (business continuity):** l'elevato numero dei moduli di potenza autosufficienti e indipendenti tra loro garantisce la massima continuità di servizio con una minima riduzione di potenza nel caso di guasto di uno dei componenti principali. Infatti se uno o più moduli di potenza dovessero guastarsi, l'amplificatore riduce la propria potenza ma continua a trasmettere.
- > **USER-FRIENDLY FEATURES:** un software con interfaccia semplice ed intuitiva permette di configurare e controllare in maniera semplice ed intuitiva tutti i parametri di esercizio della macchina.
- > **EASE OF MAINTENANCE:** l'accessibilità e semplicità di manutenzione è garantita da una avanzata ingegnerizzazione modulare del trasmettitore e dal **peso contenuto** degli apparati di cui è composto.
